## Jacqui Olliver | End The Problem

---

I work with a lot of couples and individuals who identify unhappiness with their sex lives during counselling. I assist them with healthy conflict resolution, relational challenges, communication improvement, and the dynamics that can affect their resilience as individuals, and in their relationships. Their dissatisfying sex life can sometimes be a symptom of issues I mention above, so it is often important to upskill my clients in that area first. Sometimes it is the other way around – sexual technique and function are creating their relationship unhappiness.

When it is time for some specific sexual technique assistance, I refer clients to Jacqui. I have personally attended a therapeutic session with Jacqui, so I have first hand experience, and can reassure my clients of the benefits.

I am comfortable referring couples, and individual men and women, as Jacqui can personalise her teachings for many situations. The information she gathers prior to meeting with clients (through a questionnaire) is thorough, and covers off many aspects that may impact a client's sexual functioning and expression.

Some clients have reported life changing improvements after one session with Jacqui, and this has a very positive impact on their futures. I can recommend Jacqui's teachings as simple, effective and easy to learn.

Kind regards

Suzi Wallis
